## Employees Met To Discuss Plan of Medical Aid

Committee Appointed to Investigate and Report Next Sunday

About fifty married men of employees in the town met in the Town Hall last Sunday afternoon to discuss the question of making arrangements with doctors to provide service for workmen and family for the payment of so much per month. Although single men were also expected to be interested in the movement, none were present.

The meeting was opened by Mr. Nels Luna and after explaining the object of the meeting he called for the opening. The meeting appointed Mr. A. J. Learmonth as chairman and Mr. H. Sangster as secretary.

Chairman Learmonth referred to conditions which had been arranged with local doctors a number of years ago and that all were well satisfied with the system. He was of the opinion it should be arranged again.

Mr. C. Evans suggested that they appoint a committee for information for use of hospital and service to handle money and business.

Mr. Luna submitted three systems that different employees had suggested and many other suggestions were made by the men present.

After many suggestions were made it was finally decided that a committee be appointed to investigate all suggestions and submit report to another meeting to be held in next Sunday afternoon at the same time and place. This was carried unanimously on motion of Messrs. E. T. Cook and T. Bismar.

The committee appointed were A. J. Learmonth, chairman, and A. Shaw, C. Evans, T. Bismar, E. T. Cook as representatives of the electric industry and business men.

After the meeting adjourned the committee met to discuss questions.

## More Protection Given To Home Owners

Object to Prevent Foreclosure Against Homes in Province

A bill introduced in the local legislature last Friday Hon. Louis moved first reading of the Home Owners Security Bill and the amending bill to the Deb Adjunct Act.

Introducing the Home Owners Security Bill, the minister said: "The object of the bill is to prevent foreclosures against houses in the province."

"The mortgage is if it is not cancelled, the right to foreclosure on the mortgage is taken away."

Thus it will be impossible in the future for mortgages to put the debtors out in the street by taking away their homes.

"The bill provides absolute security in the case of farm house owners and in the case of urban house owners."

Eighteen soviet men who were charged with treason were

## Conrad's House Was Burned To Ground

Had Fair Insurance on Both House and Contents

About two-thirty o'clock on Tuesday morning Mr. W. Conrad's house on Broadway just west of the railway spur track was burned to the ground. The furniture and building were a complete loss.

Mr. Conrad was of the opinion that the fire started from an overheated coal stove. He said his wife and child were in bed and just awakened in time to get out and save their lives. Fortunately none of them met with any burns or accidents.

Mr. Conrad had the building erected a short time ago and luckily he had a fair insurance on both building and contents.

## Claim Federal Should Arrange For Irrigation

Also Claim Federal Minister is of the Opinion

Members of the Hanna district of the opinion that the federal government should undertake irrigation as a national responsibility.

One of the speakers claimed that Hon. J. G. Gardiner, federal Minister of Agriculture, had admitted federal responsibility for settlement of land in the drought area.

It was claimed that with the opening of irrigation in the drought districts land would be valued from \$15 to \$45 an acre while the present value was practically nil.

It is announced that the Political Union party of this province has organized a council of men from leading the total now up to 15. When organization is completed it is said there will be 25 members.

## YOUNG SULTAN DAZZLES CAPITAL

Washington received a dazzling visitor, the Sultan of Muscat and Oman, who came from the Arabian Peninsula. The Sultan visited a view of an American delegation in 1924 when he served the American visitors with a whole baked sheep and had slaves wash their hands and faces in rose water when they had finished. The Sultan is seen with Mr. Cordell Hull, United States Secretary of State.

## School Literary News

A marvellous exhibition of enterprise work was held in the Redcliff School on Friday, March 11th. All grades took an active part in aiding the day to be a success. The grade one room did their part by having a display on display. It was complete with electric lights, porch, and appropriate furnishings for each room. The grade two class held an entertaining "Indian Camp" with each member dressed appropriately in home-made costumes. The intermediate grades co-operated with a sale of pop-corn balls and weaving and a display of book art-work and a miniature Hudson Bay Co. for The High School Needlework class raffled a beautiful cedar chest containing many useful, embroidered articles worked by the girls. This prize went to Mr. J. Macdonald. Second prize, an exquisite linen table set was won by Mrs. G. Works. And the third prize, a lovely pair of pillow-slips went to Miss Zaida Bamforth.

The grade ten needlework class also had many other beautiful and useful articles on display. Also all of the best Health, Dramatics, Needlework, Serial Studies, Biology and Golden Thought's books were exhibited. In another room, the High School 12 piece orchestra displayed their "Pop, Personality, Fun!" while tea was served. A pool concert gathered at the affair since it was the first of its kind in the community.

It is reported that W. N. Chant, S.C. member for Canoe, is considering resigning his seat at the end of the present session.

Mr. Jas Hansen who was elected S.C. member, but now sits as an independent, said in the house he could not endorse S.C. experiments that meant hardship and suffering, and suggested the government retract its steps and make amends.

## Union Churches Amalgamate Into The One Charge

Will Call Rev. H. V. Ellison For United Charge

Congregational meeting held at St. Andrew's Memorial Hall, 1700 Broadway, on Tuesday night, March 15th, for the purpose of discussing the amalgamation of the two churches into one charge after June 30th, 1938. A call will be given by both congregations to Rev. H. V. Ellison to be the minister of the united charge.

## Possibility of Serious Trouble Now in Europe

Russia Promises To Support Czechoslovakia

As conditions are now in Europe there appears to be a great possibility of serious trouble in the near future by leaders of several countries.

Some officials in Britain have suggested to form a united Kingdon to face the increasing grave international situation and the announcement of rearmament was the most tense since 1914. Since Germany has taken control of Austria, Czechoslovakia appears to be in fear of more "double and serious" attacks on Russian officials have announced that they will go at once to their support.

## Possibility Of Serious Trouble Now in Europe

Twelve Killed and Seven Were Injured

Tornadoes roared through the Mississippi valley Tuesday, leaving a trail of death and destruction over five states.

At least 17 persons were killed and seven were injured and untold property damage was caused in Missouri, Arkansas, Tennessee, Mississippi and Alabama.

Edmonton—The new bill to amend the "Social Credit" Act will be introduced in the legislature within a few days, Premier Abernethy said. Details of its provisions have not been disclosed.

## "CARRYING COAL TO NEWCASTLE"

Carrying wheat to Canada sounds like "carrying coal to Newcastle."

Yet it was the claim of two sailors who passed through Calgary on the east bound train Sunday night that a ship, of which crew they were men, were to bring a full cargo of wheat from the Argentine to Canada about 5 year ago.

The Summer School of the Fine Arts is again to be held in St. Paul, August 1st to 27th. This will be the sixth consecutive session of the school. As in previous years, courses will be given in Music, Drama and Art under the guidance of distinguished instructors.

## Plans Made For Seed, Feed, Fuel Oil

Mr. Lush Has Received Word From Cabinet Minister

Mr. D. Lush, M.L.A. has stated that the local government is now in a position to pass the appropriation for seed, feed and fuel oil for the spring operations. He stated Hon. S. E. Low has assured that arrangements have been made with Ottawa in securing appropriation which is figured to be sufficient to cover all the and in the drought area this year. It is expected that fieldmen will have instructions to "take applications within the next week or on days."

## "PROVISION MADE FOR UNEMPLOYED VETERANS"

The Federal government has announced that provision will be made for unemployed veterans of the Great War, no pensioners to the extent of \$40 a month for married men and \$10 a month for single men. This provides a new principle in the government's treatment of war veterans, such as "that the relief of war veterans is a governmental obligation."

We notice that a number of airplanes are passing over town almost every day the last few weeks. Some of them are of a silver color.

Expenditure of \$1,900,000 by the federal government on seed and seedling operations in Alberta this year was announced yesterday by Hon. J. G. Gardiner, federal minister of agriculture.

## Churches

ST. MARY'S CHURCH

Commencing next Sunday the service will be held at 9 a.m. on the following Sunday at 10 a.m. These services will be held every hour on each other week these hours on each other week.

ST. AMBROSE CHURCH  
Rev. H. S. Hammett, Vicar

JORDON MEMORIAL  
UNITED CHURCH

Rev. H. V. Ellison, Pastor  
Sunday, March 20th 1938  
10 a.m. Church School  
Lenten Service on "The Son of Man."  
11:15 a.m. morning service  
"A Challenge to Our Modern World."

7:30 Evening Service.  
"The Goal of Human Living"

The Junior Choir in the morning and the Senior Choir in the evening will help with the service.

NOTE The basement and church all winter have been warm and if you care you will be assured of comfort.

## Town Council Met on Monday For Business

Estimates for Each Department Struck for 1938

Town Council met in regular session last Monday evening with the Mayor and full council in attendance.

Mr. T. Fitzhenry was present suggesting arrangements for handling of scavenging and garbage but council stated no arrangement was made.

Mr. Geo. Walters also made a proposition but it was left over.

Mr. K. Walter was present at the meeting and he and Mr. W. B. Penry were requesting for water supply for their stock. The matter was left to the water committee with power to make satisfactory arrangements.

Mr. Moore, a representative of the Medicine Hat Garage was present giving estimates and kinds of trucks they have on hand which council is now considering buying. The matter was left for investigation.

The Health and Sanitation Committee reported that satisfactory arrangements had been made with Dr. Lewis as health inspector and was passed.

Dr. Cross Committee was asked for grant of funds for work of the organization. On motion of Councillor Evans a grant of \$50 for the organization was passed.

Dominion Glass Co. offered a price for the elevator in the Broadway Store to be moved to their plant. On motion of council the Rindahl offer was accepted.

The finance committee approved accounts and were passed by council.

An offer from Mr. Griffith for road plainer was accepted on motion of councillor Hope.

Dominion Glass Co. submitted contract to council for the use of the old Ornamental building. Council solicitor made some changes in the contract and as Mr. MacKinnon agreed to changes council decided to accept the proposition.

Council then took considerable time to set estimates for this year or expenses for each department. At the finish estimates were slightly increased from last year as some requirements for improvements were necessary.

## Highlights of the European Situation

Section of British Press Has Made Comments

Hitler has formally announced the absorption of Austria into German Reich. He states 7,000,000 German men and women in Nazi-controlled Austria his conquest of that country is a benefit to all.

France has tried to speed arrangements to back stiffer diplomatic stand against Germany.

Sections of the British press repeat Chamberlain's stand as "bitter" after "day in the face" from dictators.

LOOK AT YOUR LABEL

## Dairy Production

Butter Prices Average Higher Than Any Year Since 1930

Production of milk in Canada has been steadily increasing for the past five years, and in 1937, the output of nearly 17 billion pounds was an increase of about 200 million pounds over that of 1936. Milk is used in a variety of ways with about 40 per cent. being used in the field form. Butter-making takes the greatest amount of milk and costs to 50 per cent. of the total output. Skimmed and creamed butter, it takes about 8 per cent. of the milk produced to make cheese and approximately 1.5 per cent. of the milk is processed into concentrated milk products. The percentage going into for cream manufacture is relatively small. There was a significant gain in the value of all dairy products in 1937 when, due to increased production and higher prices, the value was the greatest recorded since 1930.

There was an increase of 19,000 in the number of milk cows in Canada from June 1, 1936 to June 1, 1937. Since that time there has been a reduction in livestock losses in the drought areas of Saskatchewan and Alberta, but it is felt that this reduction did not affect dairy cows as much as other classes of cattle.

Production of creamery butter for the ten months ended October 31, 1937, was 223.3 million pounds, a decrease over three million pounds compared with the similar period of 1936. In addition there is an annual production of approximately 100 million pounds of dairy butter made on farms. The decrease in production took place chiefly in Ontario and Quebec, where about 65 per cent. of the creamery butter is produced. Exports of butter in 1937 were somewhat below those in 1936. Imports were not significant in either year.

Butter prices increased substantially in 1937 over 1936 and averaged higher than for any year since 1930. The lowest stock position of this product, at November 1, 1937, indicated that the market would be firm and prices should average higher during the early part of 1938 compared with the corresponding period of 1937, according to the Agricultural Production and Outlook, issued by the Dominion Department of Agriculture and of Trade and Commerce.

Factory cheese production increased further in 1937 and reached the highest level since 1930. Production increased over the previous year and as prices have been considerably higher, prospects for 1938 are encouraging. Higher prices in the United Kingdom market were chiefly responsible for advances in the price of Canadian cheese. The Dominion paid for Canadian cheese over New Zealand cheese averaged 1.92 cents in 1937. Exports of cheese for two years have been approximately twice the entire Canadian output. The market is expected to be satisfactory to Canadian exporters.

Production of concentrated milk products was estimated to be 11 per cent. higher during the first five months of 1937 than during the corresponding period in 1936. Most of this was exported in the output of evaporated milk.

## Is Familiar With Plans

King George Becomes Wing Commander In Royal Air Force

Mode of nations, with the notable exceptions of Hitler and Mussolini are not much given to air travel, but in a recent week British King George took to the air. It was the second flight of the 62-year-old monarch since he ascended the throne 13 months ago. There was time, 30 years back, when he knew a good deal about planes, for during the war he served his wings as a pilot and eventually became a wing commander in the Royal Air Force.

King George VI, the second son of King to St. by his brother Edward VII, having set the precedent. Although the president has not been followed to any extent, there was evidence that palace officials were becoming more interested in the official announcement of the King's flight it was said that he would emphasize to return to his role of monarch. However, though not in complete view, it is accepted. Whether's defense is: "I heard an aircraft, sent an airplane for the purpose of travel."—New York Times.

A Month-Old Invention  
A remarkable invention is on display at Leipzig which not only opens windows, but also closes, as soon as it begins to rain or snow. As soon as the first drop of moisture falls on it, the window of door will close automatically.

Employer: "Well Madam, I presume your son is absolutely honest." Mother: "Oh, surprisingly honest, but he realizes that business is business."

## Must Be Repaired

Bridge Over Menai's Straits Has Been Open 118 Years

According to the purpose and the conditions under which bridges are erected, we have ash bridges, beam bridges, girder bridges, rigid frame bridges, simple truss bridges, cantilever bridges, movable bridges, continuous bridges, arch bridges (such as the Valla Valla Bridge which was built a few weeks ago) and suspension bridges such as the Brooklyn Bridge, the George Washington Bridge and the span which the poet Shelley called the "bending bridge" over high over Menai's Straits.

The bridge of which the poet laureate sang is still doing its work after 118 years of faithful service. It gets into print to today because there has been expressed that old faithful is getting shabby and needs a new outfit. The lack of force of the early suspension bridge will remain; in the rebuilding, the span, 500 feet long, of wrought iron, will be taken down and a stronger steel carriage support substituted. It will be supported by chains of high tensile steel, spanning the island of Anglesey, and carrying the bridge, the connection between the Welsh mainland and the island of the main approaches to Ireland.

The bridge was designed by Thomas Telford, one of the great engineers of the nineteenth century, who was first project of the Institution of Civil Engineers. Curious to relate, the rebuilding is being carried out under the supervision of a descendant of one of Telford's colleagues, Sir Alexander Gibb, still in a great line of engineers.—Buffalo Courier-Express.

## Predicted Trans-Ocean Talks

Alexander Bell's Father Was President of U.S. Navy  
British Columbia got its first Bell Telephone 60 years ago. A young "Bell" founder by the name of M. J. Bell, had been shipped to him from Bradford and demonstrated them so successfully that another 50 were ordered shortly after.

Mr. Thomas Henderson, retired Baptist cleric and a friend of the Bell family, made the instrument to Mellickton on Feb. 13, 1878. Mr. Henderson, first general agent for British Columbia, had an office at his home, 30 Riverside street, Bradford.

When Mellickton got the "talking" machine it was considerably surprised that the human voice, musical notes and other sounds could be heard through these instruments at a distance as great as 15 miles. Mellickton, who accepted the Pacific Coast agency, negotiated an exchange of the telephone at Victoria, but he was told Victoria was too far away and he had better establish his own office there. He did. It was a success.

It was just 50 years ago, too, that the telephone was first used in the telephone inventor, said: "The distance over which the telephone will be heard through these instruments is so great that it is almost impossible to determine. I have conveyed from Des Moines to Toronto—a distance of 1,000 miles—my son's voice, and he has spoken from Boston to New York—a distance of 200 miles. There seems to be no reason to doubt that it will be made to bring England and America, Australia and India, all within mutual speaking distance."

## New Marauder Practically An All-Electric Ship

Biggest product of England's shipyards, the new Marauder, a 3,000-ton ship, has now reached a stage where even of her 10 decks have been completed, installing the use of 6,000,000 volts. The 3,000-ton ship will be launched July 28 by Lady Bates, wife of Sir Percy Bates, chairman of the line. Before the Marauder makes her maiden voyage in the summer of 1939 she will have given employment to 300,000 persons. It is said that she will be a feature.

She is to be a "keep fit" (with the exception of the propelling machinery) an "all-electric" ship. There are to be 20 public rooms, several of which are to be "air-conditioned."

## Just One Drunkard

The son of a proprietor of a wholesale drapery establishment entered the business, and as he took a violent dislike to the duties of the counting house, his father decided to give him a trial "on the road."

On returning from his first trip, his father asked him how he liked it. "Oh," replied the young man, "it's quite a jolly life; you meet some decent fellows at the hotels, and have plenty of fun in the evening; but what I don't like about it is the constant loss of time."—2643

## BRITAIN'S LARGEST AIR LIFTER MAKES HER MAIDEN FLIGHT

The first of a fleet of 34 air lifters which are being built for Imperial Airways at Hamble in Hampshire, about to make her maiden flight. She has a wing span of 213 feet and an overall length of 110 feet, weighs 20 tons, is capable of 300 miles an hour and will carry 42 passengers.

## The Proper Tone

Little Girl Thought Her Mother Was Being Curious

We've just heard a growing story about a little girl named Joan, the daughter of a country gentleman. We know Joan had been a stomach friend and admirer of the local gamekeeper, a Mr. Foster, who let her play with the gamekeeper's pump. Joan talked about Mr. Foster to her mother and the mother of the young lady has been known to talk about Robert Taylor. Joan's mother therefore felt very badly in deed when she learned the other day that Mr. Foster had died of a heart attack. Thinking to keep the news from her child as long as possible she transferred her trade to another garage. Joan happened to be in the car when her mother made a stop for gas at the new place, and announced that she did not think much of "the new pump," and said, "Mr. Foster has been dead." Joan said, "The new pump?" Joan said, "The new pump?"

Deciding that since the matter had come up, Joan might as well tell the truth and the lady turned her head and said, "Joan, I'm terribly sorry to have to tell you this, and I hope you won't feel too badly. Mr. Foster is dead." Joan sighed the sigh of an often-corrected child, "All right," she said, "Foster had two pumps."—The New Yorker.

## The Big Bonspiel

A Study Of The Ways Of A Ship At An Evening Session  
There are ships who as they go down the line to shoot put their gloves carefully on; others as carefully take them off. Some take their bonspiel around, and then turn them back. The only sign some make to the raising of the bonspiel. Some shout to the sailors "Go with the bonspiel, and some leads. They sweep—no third has to his credit a shout of instruction to "Swop, Art."

"When Sam," as the rock came down, some write with the wearing progress of the stone. Some follow after, shouting encouragement. Some speak to the sailors, and some to the hatters in operation as soon as the temperature in the car falls below 40 degrees. Victoria passengers contend, however, that the device is not infallible. In when it gets too chilly in the car for their comfort, they simply raise the window next to the temperature regulator and the only rule in the car is to keep it that it is time to turn on the heat.

The moon must have been eating from the ground, his neck to too short and his legs too long for grasping.

## Ides Seem To Work

Passengers Open Windows To Heat Yonder's Street Car

When street car passengers in Yonder City, on cold days, they open a window to warm up the car. It works this way: The heat is generated automatically by a device which is supposed to set the hatters in operation as soon as the temperature in the car falls below 40 degrees. Victoria passengers contend, however, that the device is not infallible. In when it gets too chilly in the car for their comfort, they simply raise the window next to the temperature regulator and the only rule in the car is to keep it that it is time to turn on the heat.

The moon must have been eating from the ground, his neck to too short and his legs too long for grasping.

A Red Indian girl who claims to be a descendant of Sitting Bull recently obtained a lucrative film engagement. She is now sitting pretty.

Taste alone does not give the full flavor of what we eat. The flavor is divided into 20 per cent. "feet", 50 per cent. odor and 30 per cent. taste.

## Plenty Of Honest People

Discontent Could Easily Find Them In These Days

The honest, Ontario Post, tells the following stories:

A tin-dollie ball dropped out of a honest young woman's purse when she opened it and drew out one of the common other things a woman carries in her purse besides money. The day the loss was advertised the money was returned to its owner.

Over near Harris, a young lady and her mother were sitting at the table when the mother was talking to the young man who was sitting at the table with her. He is quietly received by the parents, and smiled at by the girl and her mothering brothers and sisters. But nothing is said about the reason for his call.

In the evening sister, brother and parents go to bed. Instead of choosing this moment to fall asleep, the young man sits around the fire and talks of everything except love. That is verboten. If the girl knew her father she would never see him on the fire, they cut the cake and everything is settled. If she knew the first girl it is a sign that he is not suitable. Building up the cake, he goes out into the night, never to be seen again.

In Hungary cupid postpones everything until the wedding day. Then the bride puts her pillow, feather bed and wedding chest on a wagon and is driven across the plains to her future home. On the way, however, the name of the party must be called, whip their horses to a gallop and shoot off pistols as they clatter through villages.

After the ceremony a great feast is spread, gaily orchestra play, and dancing goes on not only until the stars go home but until they come out again.

There is the classic story of Diogenes, a philosopher who lived about 400 B.C., and who is still pictured going about with a lantern trying to find an honest man. Such a procedure does not seem to be typical of the world today.

## New Health Record

Death Rate Among Married Persons Shows Decline In 1937

Last year set a new health record in the United States, judged by the mortality rate among married persons. In 1937, 17,700,000 industrial policyholders in one large insurance company. When Canadian statistics for 1937 are available it is probable that they will show an improvement as the crude death rate has been dropping during the past decade.

The United States death rate among the insured persons was 8.2 per 1,000 a decline of 2.1 per cent. from the 1935 figure. In Canada, the death rate in 1936 was 9.7 per thousand population. This however, was among all ages.

From 1926 to 1936, the death rate in Canada was 11.1 per thousand, so that the latest available figures from the Federal Department of Pensions and National Health show a reduction of 2.4 per thousand in six years.

To illustrate how the death rate is declining in the United States the insurance company which has kept the 1937 death rate with that of 1931. If the 1911 rate had prevailed in 1937, a total of 17,700,000 industrial policyholders would have been killed. The actual number of deaths was 17,700,000.

The American report deals with the chief causes of death, for which low mortality records were established in 1937. The leading causes were tuberculosis, syphilis and maternal ailments. In all of these except one, the death rate was lower in 1937 than in 1936. In 1937, the death rate was 1.1 per thousand, a decrease in the number of deaths—maternal mortality from 30 deaths over 1,000 live births in the past year to 28 deaths in 1937.

The death rate for tuberculosis fell from 465 deaths in 1936 to 343 in 1937; syphilis fell from 565 to 503; and deaths from heart disease fell from 7,748 to 7,374. Nightingale, or disease of the kidneys, on the other hand, shows a slight increase in 1937, from 1,000 to 1,010 deaths in ten years from 1,135 to 1,174.

The crude death rate for heart disease, the leading cause of death, fell from 1,135 in 1936 to 1,010 in 1937, an increase of 2.5 per thousand. The death rate for heart disease also increased between 1936 and 1937, from 1,135 to 1,174.

The crude death rate for heart disease, the leading cause of death, fell from 1,135 in 1936 to 1,010 in 1937, an increase of 2.5 per thousand. The death rate for heart disease also increased between 1936 and 1937, from 1,135 to 1,174.

The crude death rate for heart disease, the leading cause of death, fell from 1,135 in 1936 to 1,010 in 1937, an increase of 2.5 per thousand. The death rate for heart disease also increased between 1936 and 1937, from 1,135 to 1,174.

The crude death rate for heart disease, the leading cause of death, fell from 1,135 in 1936 to 1,010 in 1937, an increase of 2.5 per thousand. The death rate for heart disease also increased between 1936 and 1937, from 1,135 to 1,174.

The crude death rate for heart disease, the leading cause of death, fell from 1,135 in 1936 to 1,010 in 1937, an increase of 2.5 per thousand. The death rate for heart disease also increased between 1936 and 1937, from 1,135 to 1,174.

The crude death rate for heart disease, the leading cause of death, fell from 1,135 in 1936 to 1,010 in 1937, an increase of 2.5 per thousand. The death rate for heart disease also increased between 1936 and 1937, from 1,135 to 1,174.

The crude death rate for heart disease, the leading cause of death, fell from 1,135 in 1936 to 1,010 in 1937, an increase of 2.5 per thousand. The death rate for heart disease also increased between 1936 and 1937, from 1,135 to 1,174.

The crude death rate for heart disease, the leading cause of death, fell from 1,135 in 1936 to 1,010 in 1937, an increase of 2.5 per thousand. The death rate for heart disease also increased between 1936 and 1937, from 1,135 to 1,174.

The crude death rate for heart disease, the leading cause of death, fell from 1,135 in 1936 to 1,010 in 1937, an increase of 2.5 per thousand. The death rate for heart disease also increased between 1936 and 1937, from 1,135 to 1,174.

The crude death rate for heart disease, the leading cause of death, fell from 1,135 in 1936 to 1,010 in 1937, an increase of 2.5 per thousand. The death rate for heart disease also increased between 1936 and 1937, from 1,135 to 1,174.

The crude death rate for heart disease, the leading cause of death, fell from 1,135 in 1936 to 1,010 in 1937, an increase of 2.5 per thousand. The death rate for heart disease also increased between 1936 and 1937, from 1,135 to 1,174.

The crude death rate for heart disease, the leading cause of death, fell from 1,135 in 1936 to 1,010 in 1937, an increase of 2.5 per thousand. The death rate for heart disease also increased between 1936 and 1937, from 1,135 to 1,174.

The crude death rate for heart disease, the leading cause of death, fell from 1,135 in 1936 to 1,010 in 1937, an increase of 2.5 per thousand. The death rate for heart disease also increased between 1936 and 1937, from 1,135 to 1,174.

The crude death rate for heart disease, the leading cause of death, fell from 1,135 in 1936 to 1,010 in 1937, an increase of 2.5 per thousand. The death rate for heart disease also increased between 1936 and 1937, from 1,135 to 1,174.

The crude death rate for heart disease, the leading cause of death, fell from 1,135 in 1936 to 1,010 in 1937, an increase of 2.5 per thousand. The death rate for heart disease also increased between 1936 and 1937, from 1,135 to 1,174.

The crude death rate for heart disease, the leading cause of death, fell from 1,135 in 1936 to 1,010 in 1937, an increase of 2.5 per thousand. The death rate for heart disease also increased between 1936 and 1937, from 1,135 to 1,174.

The crude death rate for heart disease, the leading cause of death, fell from 1,135 in 1936 to 1,010 in 1937, an increase of 2.5 per thousand. The death rate for heart disease also increased between 1936 and 1937, from 1,135 to 1,174.

A small army of workmen is scattered throughout the great Westminster Abbey repairing masonry and cleaning walls and monuments, and above are the Telford monument and the memorial to William de Valence, Earl of Pembroke, being cleaned and repaired.

2-WAY RELIEF  
FOR THE MISERY OF

S

Table 2 "ASPIRIN" tablets and drink in full glass of water. Repeat twice more in 1 hour.

If fever is gone from the cold, drink one 2 "ASPIRIN" tablets in a glass of water. Repeat twice more in 1 hour.

This best relief against fever and sore throat.

How family need suggest even minor head cold.

No one will not do to take two "Aspirin" tablets when you feel a cold coming on—with a full glass of water. Then repeat, if necessary, according to directions on each package. Relief comes rapidly.

The "Aspirin" medicine is the relief that is the way many doctors advise. You may think you are overdoing it, but you are not. It is the best remedy for colds, flu, headache, and fever. It is the best remedy for colds, flu, headache, and fever. It is the best remedy for colds, flu, headache, and fever.

**Don't Demand and Get "ASPIRIN"**

MADE IN CANADA

Vagaries Of Lightning  
Travels At A Speed Of 10,000 Miles A Second

Measurement of the speed of lightning at 10,000 miles a second was reported to the American Institute of Electrical Engineers at Pittsburgh, by Karl L. McChesney.

The speed was timed at the Empire State-Building in the heart of New York city. This world's tallest building is struck often than any other known place on earth, Mr. McChesney said. It acts like a needle to draw electricity.

A motion picture camera, on top of a skyscraper half a mile from the Empire State, has caught every flash for three years. It is part of a lightning laboratory directed by Mr. McChesney for the General Electric Company.

New facts have been discovered. The most interesting, Mr. McChesney said, is that a tall building is struck by a large number of lightning bolts. Frequently before lightning hits the Empire State a glowing tongue of flames leaps upward from the top of its 1,250-foot tower. It guides the lightning that always follows, coming down to the tower.

The scientific importance of this, said Mr. McChesney, is to prove that the shape of an object on earth will often decide the direction of the initial lightning stroke.

The first time a lightning camera catches a stroke hitting a tree, Mr. McChesney said, men will understand why it is dangerous to be underneath. Sparks and streamers of fire will be seen spreading over the ground at the base of the tree he predicted.

## Clinker Acts As Receiver

Laundry's Slave Picks Up More Than Just Linen

The story of Mrs. W. Reynolds, Herrington, Illinois, picks up and reproduces strains of swing music. It's like a radio, except that Mrs. Reynolds can't turn it off.

It is a laundry store in which Mrs. Reynolds uses local coal. The music is most audible at night, from 8 to 10.

Alfred Summers and R. E. Scherert, radio technicians, conclude after an examination that the burning sound found a clinker containing a substance that is conducting the current served as a type of receiver similar to the crystal sets used in the early days.

Although London is the world's largest city, her tallest buildings don't exceed nine or ten stories in height.

Britain's steel output in November was the greatest ever known.

"You needn't be afraid, Cecil," returned Mrs. Featherby. "It was got into my eye that I read in one of those books that red Indians said."

"Are you suggesting—"

"I am."

"It is a theory well worth consideration," said Crump. "My ob-

## WHAT HO!

CHAPTER VI.—Continued

"Is anything the matter, Crump?" asked Ernest.

"Matter, sir?"

"Matter, sir?"

"No, sir; that is—no, sir."

"You look so downcast, Crump."

"I do feel so, sir."

"I hope you haven't had a loss, or something like that, Crump."

"Thank you, sir. The fact is I have had a loss. Elaine passed away last night."

"Your wife, Crump?"

"Oh, no, sir. I'm a single man, sir."

"One of your family?"

"Yes, sir. You might say so, sir. Elaine was my best friend for twenty years. You see, sir, I raised her from a pup."

"A pup up?" repeated Ernest.

"Yes, sir. I taught her tricks, for she was used to fetch my slippers for me when I was tired at night. I did not know she was so good."

"And you, sir, she was so good."

"And you, sir, she was so good."

"And you, sir, she was so good."

"And you, sir, she was so good."

"And you, sir, she was so good."

"And you, sir, she was so good."

"And you, sir, she was so good."

"And you, sir, she was so good."

"And you, sir, she was so good."

fused by a brickbat line. He avoided her eye.

"One other," he said.

"Cecil!"

"Byvia!"

Three minutes and nine seconds later Crump disintegrated himself and disappeared.

"All this, while most enjoyable, is not helping me find the account of what happened to Elaine."

"I must recover her and give her a good burial. All signs point to St. Louis."

"I have been proved by my own young scamp. We must look for her this morning about his shack."

"I've had to repentance him."

"He came in here muttering about ruddy tyrants and sticky poppays."

"With a fresh rush of energy. He caught up the rolling-pin."

"Maybe St. Louis did not write this."

"Stop, Cecil!"

"I'll cook the truth out of the sneaky snipe," raged Crump. "I'll manage that sniping squint."

"Oh, Cecil, control yourself!"

"I've been thinking of you and clanging in like an octopus to a diver. 'Count ten. Have some tea.'"

"Let me go, woman," shouted Crump, trying to spin out of the room.

"I'll be back in a minute."

"Think of your position," she cried.

"Think of me."

Mr Gus Vogel who has been in the hospital for some time is now considerably improved and is expected back home soon.

Mr John E Reid, who has recently left this district for the B.C. has purchased a cattle ranch in the Kettle Valley in the district of Penticton.

Mr Geo Kitchen, who has been attending 'Tec' school in Calgary arrived home Tuesday to spend a holiday with his parents, Mr. and Mrs J Kitchen.

Hon Solon Low, provincial treasurer, now announces that the Wage Tax Bill which was given a first reading will now be drawn out.

The many friends of Mr Adam Juban who was taken to the hospital last Sunday with a serious attack of heart trouble, will be glad to know that he is now improving favorably.

Keep in mind the big carnival which is to be held in Broadway store on April 8th. The funds from this will be turned over to the Swimming Pool committee for building a new Pool.

Mild weather of the past week has wiped out the several feet of snow we have had in town. A few miles north of town there is abundance of snow which should well irrigate farm and pasture and this spring.

Mild weather of the last week and south wind yesterday have fairly well dried up the town streets and some country roads, having of the heavy snow 6" as put considerable moisture on the ground.

Mr Otto Hanson, of the Bing district, and Miss Edna Benson, daughter of Mr and Mrs J Redcliff were married last Friday. A most enjoyable party at the bride's friends was held at her parents home in the evening.

**Who Owns  
the Assets of  
Life Insurance  
Companies?**

**Answer.**—These assets are jointly owned by more than 3,500,000 policyholders—men and women who constitute one-third of Canada's population.

**Question.**—What is the average share of each policyholder in these assets?

**Answer.**—About \$571. This shows that Life Insurance assets are made up of the savings of millions of thrifty men and women.

**Q.**—What is the nature of Life Insurance funds?

**A.**—They are trust funds held by the Life Insurance companies to pay policy claims as they fall due.

**Q.**—How are these funds invested?

**A.**—In loans to governments and municipalities—for building homes and schools—for improving farms—for constructing good roads and transportation systems—for developing industries and public utilities.

**Q.**—To what extent does Alberta share in such investments?

**A.**—More than Ninety Million Dollars of Life Insurance funds are invested in this Province.

This is the third of a series of messages, sponsored by Life Insurance Companies operating in Canada. The fourth, to appear in two weeks' time, will discuss Life Insurance investments.
